- 1 Derive formulas for performing uniform scalar quantization at a predetermined pitch  $\Delta$  and calculating approximating value by quantum number.

- 1 Derive formulas for performing uniform scalar quantization at a predetermined pitch  $\Delta$  and calculating approximating value by quantum number.
- 2 Calculate the normalized second moment of the  $n$ -dimensional cubic lattice.

- 1 Derive formulas for performing uniform scalar quantization at a predetermined pitch  $\Delta$  and calculating approximating value by quantum number.
- 2 Calculate the normalized second moment of the  $n$ -dimensional cubic lattice.
- 3 Prove that lattice  $A_1$  coincides with the lattice of integers.
